Washington DC 20555-0001

Docket Number: 71-9338  
TAC No: L24678

**Subject:** Request for Renewal of CoC No. 9338 for the 3977A Package

Dear Mr Saverot,

The CoC, USA/9338/B(U)-96 Revision 4, for Croft package design No. 3977A expires on the 31st March 2024. Please accept this communication as a formal request for timely renewal of this certificate to allow the continued use of this package and to obtain multiple validation certificates.

There have been no changes to the use or design of the package since the last approval and no further information other than that already presented has been included.

Please note, that we are required to obtain both DOT and EU validations for this design to allow continued use in Europe, therefore, if acceptable an early issue of the NRC renewal certificate would be appreciated.

Thank you.

Kind regards,

**Alex Ferguson**  
Licensing Director
