

**UNITED STATES
NUCLEAR REGULATORY COMMISSION**

REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

December 27, 2023

David P. Clark, CNMT
Radiation Safety Officer
Memorial Hospital and Health Care Center
800 W 9th St.
Jasper, IN 47546

Dear David Clark:

Enclosed is Amendment No. 37 to your NRC Material License No. 13-09274-03 consenting to the requested indirect transfer of control described in your request dated November 3, 2023 (ML23311A355).

We understand that this transfer did not result in any change to the licensee name, licensed materials, persons using licensed material, location of use, facilities or equipment, or persons responsible for Memorial Hospital and Health Care Center's Radiation Safety Program.

Based on the above understandings and as more fully detailed in the enclosed NRC staff's Consent to Transfer of Control Evaluation Report which documents the NRC staff's review of the request, the NRC consents to the indirect transfer of control.

In accordance with its review, and in accordance with Section 184 of the Atomic Energy Act of 1954 (AEA) and Title 10 of the Code of Federal Regulations (10 CFR) Section 30.34(b), the NRC consents to the transfer of control as described. The NRC understands from the letter dated October 25, 2023 (ML23312A162) that the transaction has closed and was effective on September 29, 2023.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with Title 10 Code of Federal Regulations 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Laura B. Cender
Health Physicist
Materials Licensing Branch
