2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

November 21, 2023

John T. Snider
Radiation Safety Officer
Anderson Engineering, Inc.
3213 S. West Byp.
Springfield, IL 65807

Dear Mr. Snider:

This letter is regarding your request dated November 10, 2023, to amend your U.S. Nuclear Regulatory Commission (NRC) Materials License No. 24-20063-01.

The U.S. NRC's guidance document for your proposed type of license is NUREG-1556, Volume 1, Rev. 2, dated June 2016, "Consolidated Guidance About Materials Licenses, Program – Specific Guidance About Portable Gauge Licenses." This guidance is available on the U.S. NRC website at: <https://www.nrc.gov/docs/ML1617/ML16175A375.pdf>

Upon review of the request, I identified the following areas requiring additional or clarifying information:

1. Section 8.7.1, "Radiation Safety Officer," of the guidance, states that the appointed Radiation Safety Officer (RSO) must have adequate training and experience. This is necessary so that the RSO understands the hazards and is familiar with the regulations concerning the licensed radioactive material.

Your request did not include documentation demonstrating that the proposed RSO has attained adequate training and experience with portable gauging devices.

Submit documentation demonstrating that the proposed RSO has completed a portable gauge manufacturer's course for gauge users with hands-on experience. An equivalent course meeting the requirements of Appendix C, "Criteria for Acceptable Training for Portable Gauge Users," is also acceptable.

2. Section 8.7.1, "Radiation Safety Officer," of the guidance, includes a listing of typical duties and responsibilities of the appointed RSO. Among the listing of the typical duties and responsibilities of the RSO is interacting with the U.S. NRC. To facilitate such interactions, applicable contact information for the proposed RSO is needed.

Your request did not include contact information for the proposed RSO, which should include all the following, as applicable:

- office phone number;
- mobile phone number;
- fax number; and
- e-mail address.

Please provide all applicable contact information for the proposed RSO.

In accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) §2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be made available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC website at <https://www.nrc.gov/reading-rm/adams.html>.

To continue review of your request, please submit your response to this letter within 20 calendar days from the date of this letter. In your response, please refer to the license, docket, and control number specified below. I will assume that you do not wish to further pursue this licensing action if I do not receive a reply within the specified timeframe noted above.

If you have questions, require additional time to respond, or require clarification on any of the information stated above, I encourage you to contact me at (630) 829-9737 or via e-mail at Jason.Kelly@nrc.gov.

Sincerely,

Jason M. Kelly, MPH
Health Physicist
Materials Licensing Branch
