Comanche Peak DSEIS Comments

Comanche Peak provides the following comments on the Comanche Peak Draft Environmental Impact Statement (DSEIS) NUREG-1437 Supplement 60 ML23299A252.

Submitted by Todd Evans, Manager, License Renewal, Comanche Peak

Comment #	DSEIS Section	DSEIS Page	Comment
1	Table 3-5	3-13, 3-14, 3-15	Editorial – there are a number of duplications of equipment in this table.
2	3.3.3	3-16, 3-17	Editorial – in the 3 <sup>rd</sup> paragraph of this section, there are several sentences that are duplicated.
3	Table 2-1	2-21	The Land Requirements section for the NGCC Alternative in this table states “An additional 40 ac (16ha) would be required for the associated BDTF”. Section 2.3.2.2 (page 2-24 line 1) for the NGCC Alternative states that the BDTF would be cited within 400 ac. Vistra believes the 400 ac is more appropriate and recommends Table 2-1 reflect this.
4	3.5.1.2	3-32 line 43	The water storage tanks are stated to have a capacity of 524,000 gallons. The correct capacity is 524,500 (reference section 2.2.3.5 of the ER).
5	3.6.1	3-51 line 9	The acreage is incorrectly stated for the freshwater forested/shrub wetlands. It should be “335.46 ac (135.75 ha)”.
6	3.8.4.1	3-100 line 17	“northern long-eared bats” should be “tricolored bats”.
