Re: Quantive Group, LLC: NRC RAM License 35-35301-01

To Whom It May Concern:

Please accept this letter as notification of an anticipated change of the indirect owner of Quantive Group LLC (the "Licensee"). Licensee operates the facility located at 8119 West 81st Street South, Tulsa, Ok 74131 (the "Facility"), and holds a Radioactive Material License (License Number [35-35301-01] or the "License") issued by the Nuclear Regulatory Commission. We understand that a licensee must notify the Nuclear Regulatory Commission if it anticipates a possible transfer of control. Accordingly, please accept this letter as notice to the Nuclear Regulatory Commission of a forthcoming transaction that will result in a change in the indirect owner of Licensee.

On January 09, 2024, CRC Evans Pipeline International Inc. and its relevant subsidiaries ("Seller") entered into an agreement to sell its group of companies that make up **Quantive Group LLC** to **McBride NDT Inspection Services Inc.** ("Buyer"). The group of companies to be sold includes Quantive Group LLC, Spective Technical Services LLC, and Verispex LLC, which are the business names of the entities who are party to the transaction and who are the upstream, indirect owners of the Licensee. There will be no change in the direct ownership or control of the Licensee as a result of the transaction, nor will there be any changes in the usage and application of the License at the Facility by the Licensee (the "Licensed Program"). Licensee will continue to operate the Facility at the same location and under the same legal entity name. The transaction is not expected to change or alter any of the Licensee's business or operations; its policies and procedures, equipment, personnel, and operations will remain the same following the transaction. Importantly, there will be no change to the Licensed Program, or to the management and operational staff who control and conduct the Licensed Program, as a result of the transaction.

Seller and Buyer have together completed and enclosed herein the notification forms for your records. We trust these materials provide all of the necessary information for the change in indirect owner of the Licensee. To the extent you have questions regarding this notice or require additional information, we respectfully request that you contact the following Individuals by January 31st, 2024, to enable the transaction, as anticipated.

Jeremy Guretzki – President
Jeremy.Guretzki@Quantivegroup.com
Phone: (918) 863-4994

Shane Owens – Radiation Safety Officer
Shane.Owens@Quantivegroup.com
Phone: (918) 519-8146

We greatly appreciate your time and consideration.

Sincerely,

Jeremy Guretzki
President

U.S. NRC Region IV
1600 East Lamar Boulevard
Arlington, Texas 76011-4511

RE: Quantive Group, LLC: NRC License 35-35301-01

This letter serves as a written notification on the anticipated sale of Quantive Group, LLC (dba Spective Technical Services, LLC, dba Verispex, LLC), located at 8119 West 81st Street South, Tulsa Oklahoma 74131.

1. Describe any planned changes in the organization, including but not limited to, transfer of stocks or assets and mergers, change in members of Board of Directors, etc. Provide the new licensee name, mailing address, and contact information, including phone numbers. Clearly identify when the amendment request is due to a name change only.

As described in the cover letter, CRC Evans Pipeline International Inc., and its relevant subsidiaries entered into an agreement to sell its group of companies that make up **Quantive group LLC** to **McBride NDT Inspection Services Inc.** (“Buyer”) in an equity sale. The transaction involves an indirect, upstream change of equity interests only, and will not result in a change in the direct ownership or operation of the Licensee. Accordingly, there is no change of control of the License. For the avoidance of doubt, no changes are taking place with respect to the following:

- a. The Licensed Program, including personnel having control over the licensed activities (Including the Radiation Safety Officer)
- b. The use, possession, location, or storage of licensed materials
- c. The Licensee’s organization
- d. The Licensee’s equipment
- e. The Licensee’s procedures
- f. The Licensee’s legal name, mailing address, or contact information

2. Describe any changes in personnel or duties that relate to the licensed program. Include training and experience for new personnel and any changes in the training program.

Licensee will retain the same management for the activities contemplated under the License. There will be no changes in personnel named in the License or the duties that relate to the Licensed Program as a result of the transaction.

Following the transaction, the Licensee will continue to:

- a. provide full liability for any needed facility decontamination,

- b. agree to abide by all commitments and representations previously made to the NRC by the Licensee
- c. agree to abide by all constraints, conditions, requirements, representations and commitments identified in the License
- d. Fully accept liability and responsibility for the Facility and site

3. Describe any changes in the location, facilities, equipment, radiation safety program, use, possession, waste management, or other procedures that relate to the licensed program.

There will be no changes in the location, facilities, equipment, radiation safety program, use, possession, waste management, or other procedures that relate to the Licensed Program. The management and operations of the Licensed Program will not change as a result of the transaction.

4. Describe the status of the licensee's facilities, equipment, and radiation safety program, including any known contamination and whether decontamination will occur prior to the transfer. Include the status of calibrations, leak tests, area surveys, wipe tests, training, quality control, and related records.

Licensee's facilities, equipment, and radiation safety program are currently in compliance and are expected to remain in compliance after the transaction. There will be no changes to Licensee's facilities, equipment, and radiation safety program as a result of the transaction. All required surveillance has been performed, documented, and reviewed, and all current conditions and surveillance practices will be maintained following the transaction. The surveillance program will continue to be completed with quality control evaluations, and information documenting those evaluations will be shared and reviewed. Wipe tests and surveys are, and will continue to be, completed per the guidelines and documented within the quality program. All calibrations, leak tests, and surveys are documented and retained, and the process will not be altered as a result of the transaction.

There is no known contamination of Licensee's facilities or equipment. No decontamination is necessary prior to the transaction.

5. If current decommissioning funding plans (DFP) will be changed as a result of the transfer, the revised DFP should be submitted. If other financial assurance documents will be changed as a result of the transfer, confirm that all financial assurance instruments associated with the license will be held in the transferee's name before the license is transferred, and as required by 10 CFR 30.35(f), the licensee must, within 30 days, submit financial instruments reflecting such changes.

This item is not applicable to the Licensed Program. Licensee is not required to maintain decommissioning funding plans or provide financial assurance under the License.

6. Confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or to NRC, as appropriate. These records include documentation of surveys of ambient radiation levels and fixed and/or removable contamination, including methods and sensitivity.

No decommissioning of the Facility will occur, and upon any future decommissioning of the Facility, the records concerning the safe and effective decommissioning of the Facility will be transferred to the transferee or to the NRC, as appropriate. In particular, pursuant to 10 CFR 30.35(g), Licensee shall maintain drawings and records important to decommissioning and will transfer these records to transferee or the NRC as appropriate.

7. Confirm that both transferor and transferee agree to transferring control of the licensed material and activity, and the conditions of the transfer, and that the transferee has been made aware of any open inspection items and its responsibility for possible resulting enforcement actions.

For the avoidance of doubt, the License will not be transferred as a result of the transaction, which involves only an indirect, upstream change in ownership interests of the Licensee. The new indirect owner of the Licensee nonetheless agrees to control of the licensed material and activity, and the conditions of the transfer. There are no open inspection items, and no possible resulting enforcement actions.

8. Confirm that the transferee will abide by all constraints, conditions, requirements, representations, and commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program.

Confirmed.

9. The transferee, in the case of fuel cycle facilities, shall provide documentation showing that it is financially qualified to conduct normal operations. The information can be in the form of income statements and balance sheet forecasts.

This item is not applicable to Licensee because Licensee does not hold a license for a fuel cycle facility.

Summary:

To the extent you have questions regarding this notice or require additional information, we respectfully request that you contact the following Individuals by January 31, 2024, to enable the transaction, as anticipated.

Carol Hill,

Please find attached request for indirect transfer of control.

As we discussed this morning, there will be no change in the direct ownership or control of the Licensee as a result of the anticipated transaction.

If there is any addition information needed, please let me know with the contact information below.

Regards,

Shane Owens
