NUCLEAR REGULATORY COMMISSION

REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

January 17, 2024

Jason Vickers
Radiation Safety Officer / Technical Leader
Braun Intertec Corporation
11001 Hampshire Ave. S.
Bloomington, MN 55438

SUBJECT: AMENDMENT NO. 1 TO RADIOACTIVE MATERIALS LICENSE FOR BRAUN
INTERTEC CORPORATION, U.S. NRC MATERIALS LICENSE NO. 22-16537-04

Dear Mr. Vickers:

Enclosed is Amendment No. 1 to your U.S. Nuclear Regulatory Commission (NRC) Materials License No. 22-16537-04 in accordance with your application dated October 19, 2023, letter dated January 8, 2024 and e-mail dated January 16, 2024.

Congratulations on your appointment as Radiation Safety Officer. Additional information, guidance and resources are available from the agency to assist you. This includes NUREG-1556, Volume 2, Rev. 1, October 2015, "Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Industrial Radiography Licenses," particularly including Appendix F, "Six-Month Radiographer/Radiographer's Assistant Inspection Checklist," and Appendix G, "Radiation Safety Program Audit." This guidance document is available on the NRC Web site at: <https://www.nrc.gov/docs/ML1606/ML16062A091.pdf>

In addition to identifying your appointment as Radiation Safety Officer, your license has also been amended to reflect the following changes:

- adds authorization for use of selenium-75;
- adds authorization for new devices;
- removes the open-ended license authorizations previously conferred in Item 7, Subitems A and B;
- removes authorization for a radiographic exposure device and radiographic source changer; and
- designates Mr. Mark E. Erickson as Assistant Radiation Safety Officer.

In addition, please note that the license format has been changed in accordance with our Web-Based Licensing (WBL) system. Further, based on licensing policy, the license conditions were updated to align with the standard license conditions for your license type.

Condition 16, which was previously listed in your license, has been removed. The former license condition concerned applicable transportation requirements. The removal of this license condition does not relieve you from compliance with those requirements. This condition was

deleted because the reference to [Title 10 Code of Federal Regulations \(10 CFR\), Part 71, "Packaging and Transportation of Radioactive Material."](#) is now stated in the preamble section of the license.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. NRC Region III office at (630) 829-9887 so that appropriate corrections and answers may be provided.

An environmental assessment for this action is not required because this action is categorically excluded under 10 CFR Section 51.22(c).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation; or imposition of a civil penalty; or an Order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance that NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture website at <https://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. I encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) RIS 2005-31 provides criteria to identify security related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through NRC's ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC's Generic Communications webpage under "Regulatory Issue Summaries" at <https://www.nrc.gov/reading-rm/doc-collections/gen-comm/>, and the link for frequently asked questions regarding protection of security-related sensitive information may be located at <https://www.nrc.gov/reading-rm/sensitive-info/faq.html>.
