SUBJECT					
Pending NRC New License Request - Additional Information Required					
SUMMARY AND ACTION REQUIRED (IF ANY)					
<p>This is a record follow-up of the remaining licensing items requiring resolution following the completion of the pre-licensing site visit conducted at Isotopia USA Inc. on Feb. 16, 2024.</p> <p>Please provide your signed and dated response no later than Tuesday, February 23rd, 2024.</p> <p>1. Licensed Material and Uses</p> <p>a.) The current license application materials indicate that Fluorine-18, Gallium-68, and Technetium-99m are requested for production, possession, handling, packaging, and distribution of radio-chemicals for transfer to persons authorized to receive these licensed materials, when these are not actually planned uses. Please clarify the actual proposed uses for these licensed materials such as instrument calibrations or for use in research and development as defined in 10 CFR 30.4.</p> <p>b.) An initial license to be issued prior to the completion of Phase 1 construction will be limited to materials required for instrument calibration and initial qualification of equipment. My understanding is that Lu-177, Yb-175, and Yb-177 may be required in limited quantities for these types of operations at the initial startup of the program. Please clarify the quantities of these isotopes requested at this time.</p>
