ATTN: Director, Division of Radiological Safety & Security

**RE: Expedited Request -- Change-of-Control for Radioactive Materials License No. 06-30556-01  
(Docket No. 030-35316) pursuant to 10 CFR 30.34(b)**

Pursuant to 10 CFR 30.34(b), Cabrera Services, Inc., Transferor, holder of Radioactive Material License Number (RML No.) 06-30556-01, as amended as of the date of the last amendment, requests Nuclear Regulatory Commission (NRC) expedited approval of a change of control under which EnergySolutions Federal Support (ESFS), LLC will become the parent company of Cabrera Services, Inc. effective upon closing, which is expected to occur on or about March 8, 2024.

After assuming control, the transferee intends to terminate RML No. 06-30556-01 and continue offering Cabrera services under EnergySolutions, LLC's existing RML No. 39-35044-01, as amended.

With respect to RML No. 39-35044-01 (held by EnergySolutions, LLC), there will be no changes in the organization, including but not limited to, stock ownership, assets, mergers, or members on the Board of Directors, etc.

With respect to RML No. 06-30556-01 (held by Cabrera Services, Inc.), there will be a new shareholder of the licensed entity (Cabrera Services, Inc.). The new shareholder owner will be EnergySolutions Federal Support, LLC. However, since the Cabrera Services, Inc. license will be terminated upon closing of the change of control transaction, there will be no practical changes other than the termination of the license itself. During the change of control, the licensee's name, mailing address, and contact information, including phone numbers, remain unchanged.

Possession and use radioactive materials under the RML No. 06-30556-01 are limited to temporary job sites. There is no known equipment requiring decontamination and, no use facilities identified in RML No. 06-30556-01 requiring a decommissioning plan or associated decommissioning funding.

Upon closing the designated Company Official for both licenses will be James Miller, as annotated on the attached organizational chart.

There will be no changes to the licensed radiation safety program or for the management of associated records (i.e., calibrations, leak tests, area surveys, wipe tests, training, and quality control). Records important to decommissioning of temporary job sites were transferred to the customer for retention at the completion of activities.

Then transferor and transferee agree to transferring control of the licensed material and activity, and the conditions of transfer, and that the transferee has been made aware of any open inspection items and its responsibility for possible resulting enforcement actions.

The transferee will abide by all constraints, conditions, requirements, representations, and commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program.

Both parties respectfully request that sensitive information be protected in accordance with 10 CFR 2.790 for the attached EnergySolutions Federal Support, LLC Organizational Chart as well as the EnergySolutions Federal Support, LLC Articles of Incorporation.
