& Nonproliferation  
U.S. Department of State  
2201 C Street, NW  
Washington, D.C. 20520

Dear Dir. Warden:

I refer to my letter dated April 15, 2021, requesting the views of the Executive Branch for a license amendment application (XCOM1309/01) received by the U.S. Nuclear Regulatory Commission (NRC) from Curtiss-Wright Nuclear Division (Curtiss-Wright). The currently active license (XCOM1309-R2) authorizes the export of nuclear safety class nozzle check valves to the pressurized water reactor at Unit 1 of the ShiDaoWan Nuclear Power Plant in China.

Enclosed is a revised amendment application (XCOM1309/01) from Curtiss-Wright, dated January 25, 2024. The revised amendment application seeks to: update the licensee point of contact; include all Curtiss-Wright locations in the United States as other U.S. parties to the export; revise the Intermediate Foreign Consignee name from State Nuclear Power Engineering Co. (SNPEC) to Shanghai Nuclear Engineering Research & Design Institute Co. (SNERDI); add an additional SNERDI location as an Intermediate Foreign Consignee; add Shanghai J-Tech Energy Technology Co. as an Intermediate Foreign Consignee; add Unit 2 of ShiDaoWan Nuclear Power Plant as an Ultimate Foreign Consignee (i.e., in addition to Unit 1); and clarify that the Ultimate End Use is for the CAP1400 reactors at the ShiDaoWan site.

Before taking action on this request, we would appreciate your views, in accordance with established procedures and from the overall perspective of the Executive Branch, as to whether the requested export meets the applicable criteria in the Atomic Energy Act of 1954, as amended. If you have any questions, please contact the Licensing Officer, Barry Miller ([Barry.Miller@nrc.gov](mailto:Barry.Miller@nrc.gov)) and/or Charlese Smith ([Charlese.Smith@nrc.gov](mailto:Charlese.Smith@nrc.gov)), Licensing Assistant.

Sincerely,

3/4/2024

X Peter J. Habighorst
