**SUBJECT: TERMINATION OF RADIOACTIVE MATERIALS LICENSE FOR AURORIUM,
U.S. NRC MATERIALS LICENSE NO. 13-17635-01**

Dear Ms. Bogle:

NRC Form 314, "Certificate of Disposition of Materials," dated February 21, 2024, and letter dated March 6, 2024, both signed by Scott Rosenbalm, Operations Manager/RSO, notified the U.S. Nuclear Regulatory Commission (NRC) of a request to terminate U.S. NRC Materials License No. 13-17635-01. These requests are available electronically from the Agencywide Documents Access and Management System (ADAMS) at Accession Nos. ML24052A320 and ML24066A050 respectively.

An environmental assessment for this action is not required because this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (CFR) Section 51.22(c).

I reviewed the submitted documentation of the transfer/disposal of licensed materials and the associated leak test report. Based on my review, I have concluded that all licensable radioactive material has been removed from your facilities at 1500 S. Tibbs Ave., Indianapolis, Indiana, and residual radioactive material attributable to licensed activities does not exceed current U.S. NRC criteria.

Based on these conclusions, no further remediation or actions are required with respect to U.S. NRC-regulated material. Your facilities are suitable for unrestricted use, and U.S. NRC Materials License No. 13-17635-01 is hereby terminated.

In accordance with 10 CFR §2.390 of the U.S. NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the U.S. NRC's ADAMS, accessible from the U.S. NRC website at <https://www.nrc.gov/reading-rm/adams.html>.

If you have questions, please contact me at (630) 829-9737 or Jason.Kelly@nrc.gov.

Sincerely,

Jason M. Kelly, MPH, CPH
