---

Shahe/John,

It looks like on the website the only page that needed changing was the Alpha Calibration Sources page (<https://radqual.com/product/alpha-calibration-disc-sources/>). I removed reference to those isotopes leaving Am241 or Cm244 as the only isotope options.

Went through the LEA catalog and did the same thing for any products that had those isotopes as options. <https://radqual.com/wp-content/uploads/2023/12/LEA-Catalog-2021-INIS-EN-V3-2.pdf>

We should double check the catalog just to make sure that I didn't miss anything.

The only printed materials we have that I am aware of are printed LEA catalogs ... Kevin, do we still have any?

Let me know if there is anything else that I need to do.

Clay

**Subject:** Re: Discontinuation of all Thorium, Plutonium, and Uranium Sources

Hi Clay, Kevin,

Please confirm once these products are fully removed from the website and catalogs.

If we have any offline or printed marketing materials that have references to these isotopes, please either redact or dispose/replace those marketing materials.

Best regards,

Shahe

**Subject:** Discontinuation of all Thorium, Plutonium, and Uranium Sources

Hi all,

As of today, we will no longer be marketing or selling any Thorium-, Plutonium-, or Uranium- isotope products. This includes Pu-238, Pu-239, U-233 sources from ORANO LEA. This also includes all territories (US and Internationally).

You should all be receiving a training invite via Qualio. If you have not received it, please reach out to John and Audrey.

Clay, Kevin, please remove any reference to these isotopes on the RadQual website and also redact all references in our LEA Catalog on our website and on our distributor portal.

I will be reaching out to LEA to discuss the changes.

If you have any questions or concerns, please feel free to contact John Miller or myself.

Best regards,  
Shahe
