Hi Jose,

Hope your vacation was great, and you're prepped and ready for the eclipse today!

I briefly communicate with Greg last week, and I wanted to just touch base for a quick follow up with you.

Quick recap:

- DG-5080, proposed rev 3 to RG 5.62, issued Oct 2023.
- Bottom of page 24, example (3) includes the use of explosives by unmanned aerial systems.
- UAS explosive attacks are not within the DBT.

The team last week in Kansas City, I was with an industry team working on a standard reporting template for security event notifications, and they seemed to remember that this was discussed during a public meeting, but I do not see it in the comments NEI submitted on behalf of the industry.

Just looking to see if UAS was removed or addressed in the current draft rev 3 of RG 5.62.

Thanks so much!
