Subject: FYI - SNC Notification Received of Vogtle Unit 4 - "Completion of Power Ascension Tests"
Importance: High

Hi all,

On Friday evening, 4.26.2024, SNC notified NRC of the successful completion of power ascension tests (attached and publicly available at ML24117A351) for Vogtle Unit 4 as required by License Condition 2.D.(5)(b) and report to NRC 2.D.(5)(d)*. Upon this notification, Vogtle Unit 4 was authorized to operate at steady-state power levels up to 100% thermal power (3400 MWt).

As you know, Vogtle Unit 4 is the second AP1000 design-certified reactor to be operated in the U.S.

The purpose of this email is to inform all receivers of the unit status as well as inform OCFO of the completion of this license condition which officially starts the collection of 10 CFR Part 171 annual fees. Annual fees are now applicable to Vogtle Unit 4.

If you have responsibilities per the recently updated ([Vogtle Communication Plan for License Condition Milestones 2024 - Rev2](#)) (also attached), please make the appropriate notifications.

If you have any questions, please contact Cayetano "Tanny" Santos, Jr. or Billy Gleaves.

This is the last communication from the staff of the retired Vogtle Project Office. I know I speak for both myself, Tanny Santos, and the entire VPO Team by saying it has truly been an honor and a privilege to have served on this project.

Respectfully,

Billy

William (Billy) Gleaves
Senior Project Manager
NRR/DNRL/NLIB "Licensing and Infrastructure Branch"
US Nuclear Regulatory Commission
