Subject: Request for Amendment; March 4, 2024

Discussion: After technical review of the amendment letter, further clarification was needed. Mr. Rolig acknowledged that their state license requires notification of all sealed source inventory changes, and he wanted to be sure to notify the NRC in case the requirements were the same. He verified disposal and replacement of same sealed source types. It was determined that this change does not result in the need for an amendment to the current licensed quantities. Future changes might include removal of devices to be replaced with different devices. Mr. Rolig is aware that major device and source changes may require an amendment.
