James McIntyre,
Quality Assurance Director
Sargent & Lundy
55 East Monroe
Chicago, Illinois 60603-5780

Dear James McIntyre,

By letter dated April 1, 2024, Sargent & Lundy (S&L) submitted a revision for quality assurance topical report SL-TR-1. The purpose of this email is to provide the results of the U.S. Nuclear Regulatory Commission (NRC) staff's acceptance review of this request. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant. Attached is the NRC's staff completeness determination for the S&L SL-TR-1: "Nuclear Quality Assurance Program Topical Report." The NRC staff determined that it provides sufficient information for the NRC staff to conduct a detailed technical review.

Based on the information provided in your submittal and discussions during the pre-licensing meeting on March 6, 2024, the NRC staff plans to issue its draft safety evaluation by December 20, 2024. If needed, the NRC staff will issue a request for additional information (RAI) by August 9, 2024, with a request for S&L to provide a response within 30 days. The NRC staff estimates that 130 staff hours will be needed to complete the technical review and issue the safety evaluation. The schedule and level of effort could change due to several factors including the need for additional RAIs, unanticipated changes to the scope of the review, and unsolicited supplements to the topical report. The NRC staff will communicate any changes to the review schedule or estimated staff hours by email, including the reasons for the changes.

If you have any questions, please feel free to contact me via email jeffery.smith@nrc.gov.
