SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 17-29308-01

By NRC Form 314, you informed the U.S. Nuclear Regulatory Commission (NRC) that you wished to terminate your NRC radioactive materials license. The NRC Form 314 dated February 21, 2024, stated that no radioactive materials have ever been procured or possess by the licensee.

The staff has reviewed the statements made in Form 314 dated February 21, 2024, and NRC inspection reports. Information in the docket file shows that your company has an active State of Louisiana license that authorizes the same types of material and devices as in the NRC license. NRC license number 17-29308-01 authorizes work only at temporary job sites in NRC jurisdiction. Based on the statements made and a review of your historical file, the staff concluded that all NRC licensable radioactive material will continue to be use in Agreement State jurisdiction under the terms of an Agreement State license, and that there are no field stations in NRC jurisdiction that need to be released for unrestricted use.

Please find enclosed Amendment No. 9 to License No. 17-29308-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at Samantha.Everett@nrc.gov or 817-200-1124 if you have questions or require clarification on any of the information stated above.

Sincerely,

Samantha Everett, Health Physicist
Materials Licensing Branch
