Good day,

The U.S. Nuclear Regulatory Commission (NRC) is conducting an environmental review for a license amendment requesting approval of a license termination plan (LTP) for Crystal River Unit 3 (CRU3) submitted by Accelerated Decommissioning Partners (ADP) CR3, LLC (ADP CR3) on December 12, 2022, pursuant to Title 10 of the *Code of Federal*

Regulations (10 CFR) Part 50 (see Enclosures).

The attached letter was mailed to the Florida State Historic Preservation Officer.

The NRC staff is preparing an environmental assessment (EA) under the National Environmental Policy Act of 1969, as amended (NEPA), to determine whether to prepare an environmental impact statement or finding of no significant impact. In accordance with 36 CFR 800 "Protection of Historic Properties" Section 800.8(c), the NRC staff is using the NEPA process to comply with Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), in lieu of the procedures set forth in 36 CFR 800.3 through 800.6. The EA will include identification of historic and cultural resources and historic properties, an analysis of potential effects of the proposed action, including potential effects on historic and cultural resources and historic properties as well as the NRC staff's preliminary determination.

The NRC staff has made a copy of the historic and cultural resources sections of the draft EA available for your review and comment at:

<https://www.nrc.gov/info-finder/decommissioning/power-reactor/cr3.html>.

The NRC invites you to submit any comments or concerns on the NRC's Section 106 consultation and historic and cultural resources evaluation by May 20, 2024. Comments, questions, and concerns may be submitted to Beau Goldstein, staff archaeologist at Beau.Goldstein@nrc.gov.

Beau J. Goldstein, RPA

Environmental Project Manager

U.S. Nuclear Regulatory Commission

Office of Nuclear Materials Safety and Safeguards
