U.S. Nuclear Regulatory Commission (NRC) Approved Exemption Request from Constellation Energy Generation, LLC to Allow Use of MPC-37-CBS Canisters at the Calvert Cliffs Nuclear Power Plant Unit 1 and Unit 2 ISFSI

On May 20, 2024, the U.S. Nuclear Regulatory Commission (NRC) staff approved an exemption to Constellation Energy Generation, LLC for Calvert Cliffs Nuclear Power Plant Units 1 and 2 independent spent fuel storage installation (ISFSI). Calvert Cliffs used MPC-37-CBS canisters in storage and plans future loading of MPC-37-CBS, which does not meet the terms, conditions, and specifications in the certificate of compliance for the HI-STORM FW Cask System. This exemption was issued eight weeks earlier than the requested date, and it would allow ongoing storage of nine MPC-37-CBS canisters and the future loading of six MPC-37-CBS canisters at Calvert Cliffs ISFSI beginning in July. The exemption decision will be published in the Federal Register ([ML24108A132](#)).
