

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

July 1, 2024

Jeremy Rubio, Compliance Officer  
Department of Environment, Great Lakes  
and Energy  
Kalamazoo District Office  
7953 Adobe Road  
Kalamazoo, MI 49009-5025

SUBJECT: INITIATION OF SCOPING PROCESS TO PREPARE AN ENVIRONMENTAL ASSESSMENT FOR THE ENVIRONMENTAL REVIEW OF HOLTEC DECOMMISSIONING INTERNATIONAL, LLC'S LICENSING AND REGULATORY REQUESTS FOR REAUTHORIZATION OF POWER OPERATIONS AT PALISADES NUCLEAR PLANT (EPID NUMBER: L-2024-LNE-0003) (DOCKET NUMBER: 50-0255)

Dear Jeremy Rubio:

The U.S. Nuclear Regulatory Commission (NRC) is conducting an environmental review for a series of licensing and regulatory requests submitted by Holtec Decommissioning International, LLC (HDI) that seek NRC approvals to reauthorize power operations at the Palisades Nuclear Plant (PNP). These requests include an exemption request, a license transfer request, and license amendment requests. Concurrently, the U.S. Department of Energy's (DOE) Loan Programs Office (LPO)'s proposed action, pursuant to its authority under Title 17 of the Energy Policy Act of 2005, as amended, is the consideration of providing Federal financial assistance (a loan guarantee) to support the reauthorization of power operations at PNP. Accordingly, the DOE LPO will serve as a cooperating agency on the environmental review while the NRC will serve as the lead Federal agency under the National Environmental Policy Act of 1969, as amended (NEPA). The purpose of this letter is to inform you about the NRC's upcoming environmental review activities.

Enclosure 1 provides a table which lists the submittals received and the NRC's Agencywide Documents Access and Management System's (ADAMS) accession numbers for each submittal and the associated NRC acceptance letters. This information can also be found on the NRC's website at <https://www.nrc.gov/info-finder/reactors/pali.html>.

The PNP is located in Van Buren County, Michigan, along the shore of Lake Michigan, approximately 2.5 miles northwest of Covert Township (Enclosure 2). PNP permanently ceased operations on May 20, 2022, after more than 40 years of commercial operation. In early 2023, HDI, the licensee for PNP, expressed an interest in returning the plant to an operational status. As mentioned, HDI is pursuing several licensing and regulatory actions to restore the operational licensing basis for the plant. The NRC will review HDI's submittals to ensure that HDI's proposal to restore the licensing basis of the plant to an operational status will comply with NRC safety, security, and environmental requirements. The licensing and regulatory requests, if approved, would allow for the placement of fuel into the reactor vessel and restart of

power operations in Unit 1 for the duration of the renewed facility operating license term, which expires in 2031.

By letter dated June 18, 2024 ([ML24169A434](#)), the NRC accepted the last submittal associated with the licensing and regulatory requests to potentially reauthorize power operations at PNP. As part of the review of these requests, the NRC staff is preparing an environmental assessment (EA) as required by Title 10 of the Code of Federal Regulations (10 CFR) Part 51, the NRC's regulations that implement NEPA. The NRC staff published a Notice of Intent (NOI) in the Federal Register on June 27, 2024 ([89 FR 53659](#)), thereby initiating the NRC's environmental review under NEPA. This notice informs stakeholders, including the public, that the NRC intends to conduct a 30-day scoping period to gather the information necessary to prepare an EA related to the review of the licensing and regulatory requests for the potential reauthorization of power operations at PNP.

As discussed in the NOI, the NRC and DOE LPO are providing stakeholders, including the public, with the opportunity to participate in a hybrid environmental scoping meeting to be held on July 11, 2024, at 6:00 p.m. eastern time (ET), at Mendel Center, Grand Upton Hall, at Lake Michigan College, 1100 Yore Ave, Parking Lot 3, Benton Harbor, Michigan, 49022, and will also hold an open house from 5:00 p.m. to 6:00 p.m. ET. Additional information including an the agenda for the meeting can be found on the NRC's Public Meeting Schedule website at: <https://www.nrc.gov/pmns/mtg>.<sup>1</sup> At this meeting, the NRC and DOE LPO staff will present an overview of the environmental review process, hold a brief question and answer session, and will solicit comments on the scope of the environmental review. Stakeholders will have an opportunity to provide comments during the meeting.

In addition to the public scoping meeting, comments or concerns on the scope of the environmental review may be submitted no later than the end of the comment period on July 29, 2024, via any of the following methods:

- Email comments to: [PalisadesRestartEnvironmental@nrc.gov](mailto:PalisadesRestartEnvironmental@nrc.gov);
- Mail comments to: Office of Administration, Mail Stop: TWFN-7-A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, ATTN: Program Management, Announcements and Editing Staff; or
- Federal Rulemaking Website: Go to <https://www.regulations.gov> and search for Docket ID NRC-2024-0076.

The NRC expects to issue the draft EA for public review and comment in January 2025. A copy of the draft EA will be made available for your review and comment.

---

<sup>1</sup> The meeting announcement can be found by going to the NRC's public meeting website at <https://www.nrc.gov/pmns/mtg> and locating the July 11<sup>th</sup> public scoping meeting entry. Additional information about the meeting (e.g., agenda) can be found by clicking the links in the scoping meeting entry.

If you have any questions on the project or the scoping meeting, please contact the environmental project managers, Laura Willingham at 301-415-0857 or via email at [Laura.Willingham@nrc.gov](mailto:Laura.Willingham@nrc.gov) or Mary Richmond at 301-415-7218 or via email at [Mary.Richmond@nrc.gov](mailto:Mary.Richmond@nrc.gov).

Sincerely,

Signed by Barnhurst, Daniel  
on 07/01/24

Daniel Barnhurst, Chief  
Environmental Project Management Branch 3
