**SUBJECT: SUSPENSION OF REVIEW OF RENEWAL APPLICATION DATED DECEMBER
 12, 2023, FOR BEEBE MEDICAL CENTER, NRC LICENSE NO. 07-17792-01,
 MAIL CONTROL NO. 639169**

Dear Dr. David Tam:

We have reviewed your renewal license application dated December 12, 2023, regarding the renewal of your NRC license for 10 CFR 35.100 – 35.300 authorized uses. The NRC reviewed your request and responded with a Request for Additional Information on May 2, 2024. The response to the NRC's letter was requested within 15 days. Your response, dated May 14, 2024, failed to provide adequate information necessary for the license reviewer to determine whether the application meets regulatory requirements. On June 12, 2024, in a telephone call with your Radiation Safety Officer, Malek Daneshvarnezhad, M.S., DABR, he communicated that the requested information not contained within your response to the NRC's Request for Information would require additional time to be completed. Your application, the NRC's Request for Information, and your response are available electronically from the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML24038A318.

As a formal, signed submission of this outstanding information has not been provided to our office, and it has been over the agreed upon 15 days for response since the NRC provided its letter requesting additional information, we have suspended the review of your application pending receipt of the additional requested information. Due to the delay in receiving the additional requested information that is necessary for review of your application, the NRC cannot project when it will make a determination on the application request. Once a complete, signed response is received, the NRC will provide an updated date for the NRC to complete its review.

In accordance with 10 CFR 2.390 of NRC's "Agency Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from ADAMS, accessible from the NRC Web site <https://www.nrc.gov/reading-rm/adams.html>.

D. Tam
