General Comment

I am a longtime Wyoming resident, and I am OPPOSED to the proposed Kemmerer nuclear facility. The environmental and safety issues associated with uranium mining, nuclear waste storage, and nuclear waste transport are unacceptable and far outweigh any potential benefits associated with job creation and power development.

At the height of Wyoming's uranium mining, children used to play on piles of mill tailings, with subsequent serious health problems. Given Wyoming's anti-government, anti-regulation positions, the State cannot be counted on to regulate and monitor activities associated with nuclear power development.

Thank you.
