Subject: Update to NRC Review Schedule for ISU LAR

Dear Dr. Dunzik-Gougar:

By letter dated February 13, 2023, Agencywide Documents Access and Management System Accession No. ML23074A066, as supplemented by letter(s) dated June 15, 2023 and April 26, 2024 (ML23174A104 and ML24137A307, respectively), Idaho State University (ISU) submitted a license amendment request (LAR) for the ISU research reactor facility. The current proposed LAR would: (1) Removal of Channel 2 low scram. (2) Removal of the exception statement from Technical Specifications Section 3.2.d. (3) Removal of "Unit A" and "Unit B" from Technical Specifications Table 3.1. (4) Correction of the \$/second reactivity insertion limit number in Technical Specifications Section 3.2.b.

The purpose of this letter is to inform you of a schedule update to the review of the LAR, in light of receiving the last supplement on May 16, 2024. Based on current staff review schedules, the NRC staff now expects to complete its review and make a final determination on the LAR by September 26, 2024. This estimate could change due to several factors, such as a need for additional RAI(s) and an unanticipated addition of scope to the review. The NRC staff will promptly communicate any additional schedule changes that would extend the expected completion date.

Thanks,

Andrew Miller, Project Manager
