Attn: Document Control Desk

Subject: Submission of Responses to the Nuclear Regulatory Commission Request for Additional Information for NAC International MAGNASTOR® Cask System Amendment No. 14

Docket No. 72-1031
EPID L-2023-LLA-0105 and L-2024-LLA-0158

- References:
1. U.S. Nuclear Regulatory Commission (NRC) Certificate of Compliance (CoC) No. 1031 for the NAC International MAGNASTOR® Cask System, Amendment No. 10, January 18, 2023
 2. MAGNASTOR® Cask System Final Safety Analysis Report (FSAR), Revision 13, NAC International, January 2023
 3. ED20230029, 10 CFR 72.242 Reportable Licensing Basis Non-Mechanistic Tip-over Evaluation Deficiency for the NAC-UMS and MAGNASTOR® Dry Cask Storage Systems, March 10, 2023
 4. ED20230102, Submission of Data Files to Support the Nuclear Regulatory Commission's (NRC) Review of Amendment No. 14 (Submittal 23C), July 24, 2023
 5. ED20240100, Submission of an Amendment Request for the NAC International MAGNASTOR® Cask System Amendment No. 14, July 24, 2023
 6. NRC, Application for Amendment No. 14 to the Model No. MAGNASTOR® Storage Cask – Request for Additional Information, May 7, 2024

NAC International Inc. (NAC) hereby submits responses to the NRC Request for Additional Information (RAI) issued on May 7, 2024 (Reference 6). Our responses to the RAIs can be found in Enclosure 1. This submittal includes copies of both the proprietary and non-proprietary submittal. Consistent with NAC administrative practice, this proposed SAR revision is numbered to uniquely identify the applicable changed pages. Additionally, revision bars mark the SAR text changes on the Revision MAGNASTOR - 24A pages.

In addition to the RAI responses, we are requesting the CoC description of the MAGNASTOR System (last paragraph of page 1) be revised to remove "(Type II Portland cement)". The FSAR was revised to allow the use of either ASTM C150 or ASTM C595 cement as suppliers transitioned to a cement with a smaller carbon footprint. ACI 349 identifies several ASTM specifications for cement that are acceptable per the Code requirements. ASTM C150 and ASTM C595 are two of the acceptable cement specifications identified in Section 3.2 of ACI 349. The requirements in the FSAR and Technical Specifications for the

materials, design and construction for the CONCRETE CASK remain unchanged. Specifically, NAC remains committed that the properties and durability of concrete produced using ASTM C595 blended hydraulic cements will meet those requirements already evaluated in the FSAR.

Per Attachment 1 to this letter, NAC requests information in Enclosures 1 and 4 to be withheld from public disclosure per 10 CFR 2.390. In accordance with NAC's administrative practices, upon final acceptance of this application, 23C and 24A changed pages will be reformatted and incorporated into the next revision of the MAGNASTOR SAR.

If you have any comments or questions, please contact me on my direct line at 678-328-1252.

Sincerely,

**Heath M.
Baldner**

Attachment
Attachment 1 – NAC International Affidavit Pursuant 10 CFR 2.390

Enclosure:

Enclosure 1 – Responses to NRC Request for Additional Information
Enclosure 2 – Proposed Changes Certificate of Compliance
Enclosure 3 – List of Changes for MAGNASTOR® FSAR
Enclosure 4 – MAGNASTOR® LOEP and FSAR Changed Pages, Revision 24A

**NAC INTERNATIONAL
AFFIDAVIT PURSUANT TO 10 CFR 2.390**

George Carver (Affiant), Vice President, Engineering and Support Services, of NAC International, hereinafter referred to as NAC, at 2 Sun Court, Suite 220, Peachtree Corners, Georgia 30092, being duly sworn, deposes and says that:

1. Affiant has reviewed the information described in Item 2 and is personally familiar with the trade secrets and privileged information contained therein, and is authorized to request its withholding.
2. The information to be withheld includes the following NAC Proprietary Information that is being provided to support the technical review of NAC's Request for a Certificate of Compliance (CoC) (No. 1031) for the NAC International MAGNASTOR Cask System.
 - Enclosure 1 – Responses to NRC Request for Additional Information
 - Enclosure 4 – MAGNASTOR® LOEP and FSAR Changed Pages, Revision 24A

NAC is the owner of the information contained in the above documents. Thus, all of the above identified information is considered NAC Proprietary Information.

3. NAC makes this application for withholding of proprietary information based upon the exemption from disclosure set forth in: the Freedom of Information Act ("FOIA"); 5 USC Sec. 552(b)(4) and the Trade Secrets Act; 18 USC Sec. 1905; and NRC Regulations 10 CFR Part 9.17(a)(4), 2.390(a)(4), and 2.390(b)(1) for "trade secrets and commercial financial information obtained from a person, and privileged or confidential" (Exemption 4). The information for which exemption from disclosure is herein sought is all "confidential commercial information," and some portions may also qualify under the narrower definition of "trade secret," within the meanings assigned to those terms for purposes of FOIA Exemption 4.
4. Examples of categories of information that fit into the definition of proprietary information are:
 - a. Information that discloses a process, method, or apparatus, including supporting data and analyses, where prevention of its use by competitors of NAC, without license from NAC, constitutes a competitive economic advantage over other companies.
 - b. Information that, if used by a competitor, would reduce their expenditure of resources or improve their competitive position in the design, manufacture, shipment, installation, assurance of quality or licensing of a similar product.
 - c. Information that reveals cost or price information, production capacities, budget levels or commercial strategies of NAC, its customers, or its suppliers.
 - d. Information that reveals aspects of past, present or future NAC customer-funded development plans and programs of potential commercial value to NAC.
 - e. Information that discloses patentable subject matter for which it may be desirable to obtain patent protection.

The information that is sought to be withheld is considered to be proprietary for the reasons set forth in Items 4.a, 4.b, and 4.d.

5. The information to be withheld is being transmitted to the NRC in confidence.
6. The information sought to be withheld, including that compiled from many sources, is of a sort customarily held in confidence by NAC, and is, in fact, so held. This information has, to the best of my knowledge and belief, consistently been held in confidence by NAC. No public disclosure has been made, and it is not available in public sources. All disclosures to third parties, including any required transmittals to the NRC, have been made, or must be made, pursuant to regulatory provisions or

**NAC INTERNATIONAL
AFFIDAVIT PURSUANT TO 10 CFR 2.390**

proprietary agreements, which provide for maintenance of the information in confidence. Its initial designation as proprietary information and the subsequent steps taken to prevent its unauthorized disclosure are as set forth in Items 7 and 8 following.

7. Initial approval of proprietary treatment of a document/information is made by the Vice President, Engineering, the Project Manager, the Licensing Specialist, or the Director, Licensing – the persons most likely to know the value and sensitivity of the information in relation to industry knowledge. Access to proprietary documents within NAC is limited via “controlled distribution” to individuals on a “need to know” basis. The procedure for external release of NAC proprietary documents typically requires the approval of the Project Manager based on a review of the documents for technical content, competitive effect and accuracy of the proprietary designation. Disclosures of proprietary documents outside of NAC are limited to regulatory agencies, customers and potential customers and their agents, suppliers, licensees and contractors with a legitimate need for the information, and then only in accordance with appropriate regulatory provisions or proprietary agreements.
8. NAC has invested a significant amount of time and money in the research, development, engineering and analytical costs to develop the information that is sought to be withheld as proprietary. This information is considered to be proprietary because it contains detailed descriptions of analytical approaches, methodologies, technical data and/or evaluation results not available elsewhere. The precise value of the expertise required to develop the proprietary information is difficult to quantify, but it is clearly substantial.
9. Public disclosure of the information to be withheld is likely to cause substantial harm to the competitive position of NAC, as the owner of the information, and reduce or eliminate the availability of profit-making opportunities. The proprietary information is part of NAC’s comprehensive spent fuel storage and transport technology base, and its commercial value extends beyond the original development cost to include the development of the expertise to determine and apply the appropriate evaluation process. The value of this proprietary information and the competitive advantage that it provides to NAC would be lost if the information were disclosed to the public. Making such information available to other parties, including competitors, without their having to make similar investments of time, labor and money would provide competitors with an unfair advantage and deprive NAC of the opportunity to seek an adequate return on its large investment.

**NAC INTERNATIONAL
AFFIDAVIT PURSUANT TO 10 CFR 2.390**

STATE OF GEORGIA, COUNTY OF GWINNETT

Mr. George Carver, being duly sworn, deposes and says:

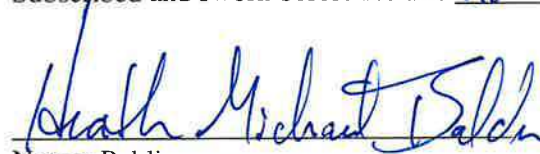

That he has read the foregoing affidavit and the matters stated herein are true and correct to the best of his knowledge, information and belief.

Executed at Peachtree Corners, Georgia, this 26th day of June, 2024.

George Carver
Vice President, Engineering and Support Services
NAC International

Subscribed and sworn before me this 26th day of June, 2024.
