

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

July 1, 2024

MEMORANDUM TO: Desiree Davis, Chief
Security Oversight and Support Branch
Division of Security Oversight
Office of Nuclear Security and Incident Response

FROM: Jeffrey Bream  Signed by Bream, Jeffrey
on 07/01/24
Senior Security Risk Analyst
Security Oversight and Support Branch
Division of Security Oversight
Office of Nuclear Security and Incident Response

SUBJECT: SUMMARY OF PUBLIC MEETING ON SRM-COMSECY-19-0006
IMPLEMENTATION PLAN

Meeting Identifier: 20240817

Date of Meeting: June 25, 2024

Type of Meeting: Information Meeting

Purpose of Meeting: The purpose of this meeting was to discuss and seek feedback on the NRC's review and implementation plan for SRM-COMSECY-19-0006, "Revised Security Inspection Program Framework." This meeting discussed the Commission's direction contained in SRM-COMSECY-19-0006, the revision schedule for Inspection Procedure (IP) 71130.03, "Contingency Response – Force on Force Testing" and IP 71130.05, "Protective Strategy Evaluation and Performance Evaluation Program", the expected implementation timeline, and additional considerations that will be included in the NRC review. The NRC also sought feedback from the industry on anticipated plans and challenges for implementation of the revised inspection procedures.

General Details: The meeting was attended by approximately 76 NRC personnel and external stakeholders. Representatives from NEI, Entergy, and the Union of Concerned Scientists were among the participants that identified themselves and provided comments or questions. The meeting started at 1:00pm EDT and completed by 1:30pm EDT, ahead of the anticipated schedule. The meeting was held virtually over the Microsoft Teams application.

Summary of Presentation: The NRC provided a formal presentation for the meeting discussion. This presentation can be located at [ML24176A206](#). No other participants provided a formal presentation.

The NRC staff and NEI made opening comments prior to the beginning of the NRC presentation.

The NRC presentation provided background on the development of COMSECY-19-0006 and the revised force-on-force inspection program. The NRC discussed the proposed implementation plan and schedule for review and issuance of IP 71130.03 and IP 71130.05 per the Commission direction in SRM-COMSECY-19-0006.

NEI comments did not object to the NRC's proposed effective date of January 1, 2026, for IP 71130.03 and IP 71130.05. NEI commented that any effort the NRC could take to issue the IPs sooner than the proposed June 2025 date in the implementation plan would be preferable. NEI cited providing as much additional time for licensee review and self-assessment prior to the effective date as the reason for requesting earlier issuance of the revised inspection procedures. Additionally, NEI requested the NRC consider a pilot for the inspection procedures to ensure a smoother implementation.

One member of the public provided comment that NRC should take steps to ensure meaningful exercises are conducted in accordance with the enhanced IP 71130.05 given that this IP is the basis for reducing the number of NRC conducted exercises in IP 71130.03.

Action Items/Next Steps: The NRC committed to holding future public meetings in accordance with the proposed implementation plan to provide internal and external stakeholders status updates on the state of progress in completing the revisions of IP 71130.03 and IP 71130.05.
