**Subject:** ACTION: Opportunity to review and comment on an NRC information collection 10 CFR part 54, Requirements for Renewal of Operating Licenses for Nuclear Power Plants (3150-0155)

The Nuclear Regulatory Commission recently published a Federal Register Notice announcing our intent to submit an information collection request to the Office of Management and Budget (OMB) for 10 CFR part 54, "Requirements for Renewal of Operating Licenses for Nuclear Power Plants." A supporting statement describing the requested information is available at <http://regulations.gov> by searching docket [NRC-2023-0201](#).

As a potential respondent to this information collection, we are interested in your feedback. Specifically, we are seeking input on the following questions by August 26, 2024:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility? Please explain your answer.
2. Is the estimate of the burden of the information collection accurate? Please explain your answer.
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Comments can be submitted by going to <http://www.regulations.gov> and searching for Docket No. [NRC-2023-0201](#). Please note that comments will be made available for public inspection. Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including any information in your submission that you do not want to be publicly disclosed.

Thank you all for your time and help.
