SUBJECT: PEACH BOTTOM ATOMIC POWER STATION UNIT 1 – REQUEST FOR ADDITIONAL INFORMATION RE: REQUEST FOR ALTERNATIVE SCHEDULE TO COMPLETE DECOMMISSIONING BEYOND 60 YEARS OF PERMANENT CESSATION OF OPERATIONS (EPID L- 2023-LLN-0004)

Dear David P. Helker:

By letter dated October 20, 2023, (Agencywide Documents Access and Management System Accession No. ML23293A305), as supplemented by letter dated May 13, 2024 (ML24134A179), Constellation Energy Generation, LLC (Constellation, the licensee) submitted a request for Peach Bottom Atomic Power Station, Unit 1 (Peach Bottom Unit 1). The proposed request would allow the completion of decommissioning for Peach Bottom Unit 1 beyond 60 years of permanent cessation of operations.

The U.S. Nuclear Regulatory Commission (NRC) staff has reviewed the information submitted by the licensee and determined that additional information is required to complete its review. The requested additional information is attached. The draft questions were sent to Richard Gropp Jr. of your staff to ensure that they were understandable, the regulatory basis for the questions was clear, and to determine if the information was previously docketed. Please respond within 30 days.

If you have any questions, please contact me.
