- C. For the Authorized Users with a Bachelor of Medicine, Bachelor of Surgery (MBBS) – the MBBS is acceptable because the NRC is granting an exemption, under 10 CFR 35.19, to include these individuals as AUs under 10 CFR 35.2. In this instance, these physicians have obtained state licensure as medical doctors. Allowing their ability to be authorized users on this license is authorized by law, will not endanger life or property or the common defense and security and is otherwise in the public interest given the equivalency of their professional training and degree to that of a “medical doctor” or “doctor of osteopathy.”
13. In addition to the possession limits in Item 8, the licensee shall further restrict the possession of licensed material to quantities below the minimum limit in 10 CFR 30.35(d) for which decommissioning financial assurance is required.

14. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. This license condition applies only to those statements, representations, and procedures that are required to be submitted in accordance with the regulations. Additionally, this license condition does not limit the licensee's ability to make changes to the radiation protection program as provided for in 10 CFR 35.26. The U.S. Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence impose on the licensee requirements that are more restrictive than or in addition to the regulations.
