General Comment

The Palisades Nuclear Power Plan has operated outside of the ASHRAE standard for its last 10 years of life. Entergy did not want to invest in costly maintenance and frequently requested exceptions to the standard which were granted by the NRC with a rubber stamp.

I strongly urge the NRC to conduct an environmental impact assessment of Palisades before it is allowed to re-open. This is such an irregular event that has no rules or operational model for re-opening a shuttered plant. We need to establish new ASHRAE standards for this.

I am concerned for the safety of nearby residents and for the protection of our Great Lakes.
