

In order to terminate NRC License 24-32459-01, the following information is needed:

- 1) A completed NRC Form 314, "Certificate of Disposition of Materials," signed by duly authorized management representatives requesting termination of the above referenced license. The form can be found at: <https://www.nrc.gov/reading-rm/doc-collections/forms/nrc314info.html>
- 2) Please describe the unsealed radioactive material used on-site (list radioisotopes) and the date when the material was last used.
- 3) Please provide a list/inventory of sealed sources used at your facility including serial numbers, quantities etc.
- 4) Please provide the most recent leak test results (before the sources were transferred) for each of the sealed sources, if required.
- 5) Please describe the location where the sealed sources were transferred. Please provide documentation acknowledging that all sealed sources (list of the sealed sources included) were received by an authorized recipient (another, waste disposal facility). Please provide a copy of the recipient's license (if not an NRC licensee).
- 6) A final status radiation survey and contamination survey for all areas where radioactive material was used under the license (surveys after all material is gone);
 - a. A survey map providing contamination (in cpm and dpm) and radiation readings (mR/hr) keyed to specific locations within each room where radioactive material was used and stored (a diagram of the facility with cpm/dpm and mR/hr readings/points shown on the diagram with description of the reading/point such as floor, countertop etc.);
 - b. Background contamination and radiation readings;
 - c. Guidance/action levels for contamination and radiation readings;
 - d. Instrumentation used to conduct the surveys including the manufacturer's names and model numbers;
 - e. Calibration dates for survey meters;
 - f. Efficiency/correction factors for well counters;
 - g. Date and name/s of individuals performing the status survey
- 7) Confirmation that all radioactive waste has been decayed to background or disposed of to an authorized recipient.
- 8) Confirmation that no radioactive material is present at the facility.
