August 20th, 2024

Dan Graham,
Purchasing Manager
Niles Industrial Coatings
201 S Alloy Dr
Fenton MI, 48430

Dear Dan Graham:

This letter is to acknowledge receipt of your application dated July 20th, 2024, requesting U.S. Nuclear Regulatory Commission (NRC) License for portable gauge usage. An initial processing of your request, which included an acceptance review, has been performed, and we found that the application is lacking in significant amounts of required information.

The NRC staff has reviewed your application and concluded that it did not provide technical information in sufficient detail to enable the staff to complete its detailed review and make an independent assessment regarding the acceptability of the proposed application in terms of regulatory requirements and the protection of public health, safety, and the environment. With incomplete documents and the unavailability of adequate information, the NRC staff is unable to begin its detailed safety evaluation of the application in its entirety. This determination to not accept your application for review is made without prejudice; you may supplement your application and resubmit if you desire. If you decide to resubmit your application, please ensure that you have provided the application including information contained in NUREG 1556, Volume 1, Revision 2, "Consolidated Guidance About Materials Licenses, Program-Specific Guidance About Portable Gauge Licenses", as we discussed during a telephone call on August 6th, 2024.

In accordance with Title 10 of the Code of Federal Regulations (10 CFR) 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Gianna Porro
Health Physicist
