PART I.D -- COMMENTS

We received your request on June 14, 2022. Your request provided that U.S. Nuclear Regulatory Commission (NRC) staff should use the following search terms: [1] unidentified flying objects (UFOs), [2] unidentified aerial phenomena (UAP), [3] unidentified objects, and [4] unidentified aircraft. You then clarified that you did not want NRC staff to use "drone" as a search term; however, if records referencing drones are compiled as a result of using the four specified terms, then such records would be considered responsive. Based upon your request and clarification, we tasked the Office of Nuclear Security and Incident Response (NSIR) here at headquarters as well as each of the four regional offices to search for, and provide disclosure recommendations as to, any responsive records.

On February 23, 2024, we issued a first interim response, addressing records that Region I staff located. We further informed you that staff in Regions II and III reported that they located no responsive records.

This second, and final, response addresses the records located by Region IV staff. They are enclosed; please refer to Part II for the exemptions claimed. This completes the processing of your request. We appreciate your patience.

To the extent you haven't already done so, you may wish to check out the reports that the Federal Aviation Administration (FAA) makes available to the public; some may arise from sightings over nuclear power plants.
