August 21, 2024

E. G. Raj, M.D.
Radiation Safety Officer
Premier Medical Clinics
1165 S. Linden Road
Flint, MI 48532

Dear E. G. Raj, M.D.:

Enclosed is Amendment No. 17 renewing your NRC Material License No. 21-26540-01 in accordance with your request.

Your license has been issued for a 15 year term and will not expire until August 31, 2039.

If you have any questions or comments please contact me at colleen.casey@nrc.gov. My fax number is (630) 515-1078. My office phone no. is (630) 829-9841 but reaching me via email is most reliable and efficient.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Please note that we have prepared your renewal in our Web Based Licensing system (WBL), a newer format that we have been using since 2016.

We deleted Condition No. 13 from your license, as it appeared on Amendment No. 16, because the commitments in your letter dated April 16, 2024, sufficiently capture this requirement.

We deleted Condition No. 14 from your license, as it appeared on Amendment No. 16, because the Preamble at the top of page 1 of your license sufficiently captures this requirement.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

Colleen Carol Casey
Health Physicist
Materials Licensing Branch

License No. 21-26540-01
Docket No. 030-33371
