SUBJECT: ISSUANCE OF SUPPLEMENTAL ENVIRONMENTAL IMPACT STATEMENT
SCOPING PROCESS SUMMARY REPORT RELATED TO THE DIABLO
CANYON NUCLEAR POWER PLANT, UNITS 1 AND 2 LICENSE RENEWAL
APPLICATION (EPID NUMBER: L-2023-LNE-0004)

Dear Adam Peck:

The U.S. Nuclear Regulatory Commission (NRC) staff conducted the environmental scoping process and solicited public comments pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR) Section 51.29, "Scoping-environmental impact statement and supplement to environmental impact statement," from January 24, 2024, to February 23, 2024. This process helped determine the scope of the NRC staff's environmental review of the Pacific Gas and Electric Company (PG&E) application for renewal of Facility Operating License Nos. DPR-80 and DPR-82 for Diablo Canyon Nuclear Power Plant, Units 1 and 2 (Diablo Canyon), respectively. The scoping process is the first step in the NRC staff's development of a supplement to NUREG-1437, "Generic Environmental Impact Statement for License Renewal of Nuclear Plants—Final Report," specific to the Diablo Canyon license renewal application. At the conclusion of the scoping process, the NRC staff prepared the enclosed supplemental environmental impact statement scoping process summary report, which is a concise summary of the determinations and conclusions reached through the scoping process, including the significant issues identified, that also discusses the comments received during the scoping period. In accordance with 10 CFR 51.29(b), the NRC staff will send an electronic copy of the report to each participant in the scoping process who provided contact information.

A. Peck

2

If you have any questions concerning the NRC staff's environmental review for this license renewal application, please contact Kim Conway of my staff via email at kimberly.conway@nrc.gov.

Sincerely,

Signed by Koenick, Stephen
on 09/20/24

Stephen S. Koenick, Chief
Environmental Project Manager Branch 1
