Subject: Clarifying Questions about lost source

Discussion:

The NRC inspector Michael Wutkowski was Called back by the RSO of Agilent, David Bennett. The RSO provided clarifying information based on their report submitted on July 30, 2024. The RSO confirmed that that Agilent does not have 100% certainty that the source was received but did confirm that the licensee that shipped them the source confirmed that they did not have the material. The RSO confirmed that they did make every attempt to locate the lost source in the dumpster but was unable to physically remove compacted trash. Furthermore, the source itself is in a shielded position which is difficult to almost impossible to detect with a GM survey meter even at near surface contact. The RSO confirmed that annual training will be performed as additional corrective actions to those already detailed in their 30-day report.
