?? Given the violations that have occurred with RSL administration, and your corrective actions that indicate you have ceased this activity, we were thinking that the ARSO authorizations for RSL should be removed. Do you concur?

We are not using RSL in mammography but may be some remaining RSL stored at the MTFs.  
Should we wait until next Amendment and until we verify all the RSL inventories were returned to vendor or stored/disposed as waste.  
If this is not a factor, go ahead and remove RSL.

?? Should we list you as the contact person for the NSTS database or should someone else be listed? We will need the following information for the designated individual:

Can you have more than one person listed? For example, I need access to the database but will like to have Mr. Shivji listed for continuity purposes.  
At least one of us will always be available.

Contact person for NSTS database:
