Perioperative Services  
Greenwich Hospital  
5 Perryridge Road  
Greenwich, CT 06830-4608

SUBJECT: GREENWICH HOSPITAL, REQUEST FOR ADDITIONAL INFORMATION, MAIL CONTROL NO. 641414

Dear Lauren Stoerger:

This is in reference to your letter dated June 11, 2024, requesting to amend NRC License No. 06-09522-01, and your subsequent response letter dated August 29, 2024. In order to continue our review, we need the following additional information. Please note that the specific requests and suggested format for responses to these items may be found in Appendix C to NUREG–1556, Volume 9, Revision 3, “Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Medical Use Licenses” found at <https://www.nrc.gov/docs/ML1925/ML19256C219.pdf>.

1. The submitted NRC Form 313A (RSO) does not provide sufficient information to name Garrett Otis as Radiation Safety Officer (RSO). Under Part 1 – Training and Experience, Garrett Otis selected Pathway 1, the Board Certification pathway. However, a board certificate was not included. If Garrett Otis is certified by a specialty board whose certification process has been recognized by the Commission or an Agreement State for 10 CFR 35.50 (Training for RSO and ARSO), please provide a copy of the board certificate. In order to determine if a board certificate is recognized by the NRC, you may review the following webpage: <https://www.nrc.gov/materials/miau/med-use-toolkit/spec-board-cert.html#3550>. If Garrett Otis is not board certified or if the board certificate is not recognized by the NRC, please resubmit the NRC Form 313A (RSO) following Pathway 5, Structured Educational Program for Proposed RSO or ARSO.
2. Regarding your requested RSO, there is a contradiction between the statement in your letter August 29, 2024 and the details in your RSO delegation of authority dated August 29, 2024. Your letter states that Garrett Otis will be at Greenwich Hospital for a minimum of four hours of on-site time per month while your delegation of authority indicates that Garrett Otis will be spending eight hours per week conducting radiation protection activities at Greenwich Hospital. Please clarify your statements and provide the number of hours that Garrett Otis will be working on-site at Greenwich Hospital and the number of hours that Garrett Otis will be conducting radiation protection activities at Greenwich Hospital. Please submit a new delegation of authority if applicable.
3. Please confirm that Matthew Hoerner is a full-time employee at Greenwich Hospital. If Matthew Hoerner is a full-time employee of Yale-New Haven Hospital and not a direct in-house representative of Greenwich Hospital, please identify, by name and title, an in-

house representative at Greenwich Hospital who will serve as the point-of-contact during the RSO's absence. Additionally, please provide commensurate contact information (i.e. phone number and email address) for that individual.

We will continue our review upon receipt of this information. Please reply to my attention at [Netra.Patel@nrc.gov](mailto:Netra.Patel@nrc.gov).

In order to continue prompt review of your application, we request that you submit your response to this letter within 7 calendar days from the date of this letter.

An electronic version of the NRC's regulations is available on the NRC Web Site at: [www.nrc.gov](http://www.nrc.gov). Additional information regarding medical uses of radioactive materials may be obtained on the NRC Web Site at: <http://www.nrc.gov/materials/miau/med-use-toolkit.html>. This site also provides the updated Training and Experience NRC Form 313A series of forms and guidance, as well as information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web Site at: <http://www.nrc.gov/reading-rm/adams.html>. Please be aware that you may request that certain portions of your submittal to NRC be withheld from public disclosure as proprietary information. To do this, you must execute an affidavit as specified in 10 CFR 2.390. You must list all portions that you wish to be held proprietary, along with your reasoning as to why that is appropriate. While it is allowable, please refrain from submitting proprietary information in support of a license unless necessary. Keep in mind that all NRC licenses are considered to be in the public domain, and therefore may be viewed by any member of the public who requests to see them.

If you have any questions regarding this request for additional information, please contact me at 610-337-5364 or via electronic mail at [Netra.Patel@nrc.gov](mailto:Netra.Patel@nrc.gov).

Thank you for your cooperation.

Sincerely,

Netra Patel, Health Physicist
