Subject: RE: Request for review: EA for Lead Cascade Facility license termination

Good Morning,

So far, we have received no comments from the State of Ohio on this draft EA. If you will have comments, please let us know and provide them as soon as possible.

Thank you,
Christine

Subject: Request for review: EA for Lead Cascade Facility license termination

Good Morning,

As I mentioned in my June 11 email (see below), the NRC is preparing to terminate American Centrifuge Operating's license for the decommissioned Lead Cascade Facility, license SNM-7003. For your review, the attached Federal Register notice contains a draft environmental assessment (EA) for this proposed license termination (section III of the notice). Additional background about the decommissioning process and final status surveys is provided both in the FRN and in the email below.

I'll send the password to open the file in a follow-up email. Please provide any comments on

this document **by October 7, 2024**. Thank you for your attention to this matter.

Kind Regards,
Christine

Christine Pineda

Subject: Please reply re: upcoming EA for Lead Cascade Facility license termination

Dear Staff of the ODH, OEPA, and OEMA,

The purpose of this email is to notify you of an upcoming license termination and to ask that you kindly indicate whether you would like to review the draft environmental assessment (EA) for this action.

The NRC is preparing to terminate American Centrifuge Operating's (ACO's) license SNM-7003 for the American Centrifuge Lead Cascade Facility in Piketon, Ohio. ACO's request to terminate the license, dated November 2, 2023, is here: [ML23311A313](#). In addition, ACO submitted form 314, "Certificate of Disposition of Materials" ([ML24135A205](#)). The information included with this certification describes ACO's April 2018 final status survey report, the NRC's May 2018 confirmatory survey, and the NRC's follow-up onsite inspection. The inspection report (No. 07007003/2018001) is here: [ML18260A122](#)

The NRC staff are preparing documentation for the license termination, and this will include an EA for compliance with the National Environmental Policy Act. The EA will reference the NRC's approval of the decommissioning plan and the 2018 EA for that action (2018 EA is here: [ML18204A294](#)), as well as the final and confirmatory surveys and the NRC inspection.

Please reply to this email to let me know whether you are interested in reviewing a draft of the NRC's EA. If you have any questions or would like to discuss this matter further, please let me know.

Kind Regards,

Christine
