---

Hi Alyssa,

I am working to finish up the NRC license termination submitted for USARIEM. I left a voice mail for you, but thought I would send a quick email in case you don't get it. I am looking for the last Cd-109 leak test reports you have prior to returning the sources to E&Z in 2021. The documents should be sent ASAP and can be sent directly to me with an attached pdf letter including your license information and explanation for the documents submitted. Please call if you have any questions.

Best Regards,  
Misty
