SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 35-35301-01

By letter dated September 13, 2024, you informed the U.S. Nuclear Regulatory Commission (NRC) that you wished to terminate your NRC radioactive materials license. The letter stated that all radioactive material had been transferred to another NRC licensee as part of a merger of companies.

The staff has reviewed the statements made in your letter dated September 13, 2024, and NRC inspection reports. Information in the docket file shows that your company has merged with another company that has an active State of Oklahoma license that authorizes the same types of material and devices as in the NRC license number 35-35301-01. That company also has an active NRC license that authorizes the same types of material and devices as in NRC license number 35-35301-01. NRC license number 35-35301-01 authorizes work only at temporary job sites in NRC jurisdiction. Based on the statements made, a review of your historical file, and an on-site inspection, the staff concluded that all NRC licensable radioactive material will continue to be used in Agreement State jurisdiction under the terms of an Agreement State license, and in temporary job sites within NRC jurisdiction under the terms of an active NRC license and that there are no field stations in NRC jurisdiction that need to be released for unrestricted use.

Please find enclosed Amendment No. 5 to License No. 35-35301-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at 817-200-1546 if you have questions or require clarification on any of the information stated above.

Sincerely,

Casey Alldredge, Health Physicist
Materials Licensing Branch
