PA DEP Transfer Notification Signed 08.16.2024.pdf
Importance: High

Hi Randy,

Please find attached a training and experience for Ryan Knox, for your review regarding the license transfer. Also attached is our training certificate for his completion of 40 hour initial training and documentation of hands on and classroom training for various devices on our license.

With regards to the status of business location and shop location, you were correct in that it was not stated about the division of locations post transfer. The basis for that was on our NRC License (37-30850-01 amendment 16) was that per the License, we do not possess or take possession radioactive materials per the license. The change to 238 Jenny Lane, Stewartstown, pa. is for Business location, correspondence, contact, etc. Shop activities will continue at 337 Distillery Hill Road, Benton, pa at this time. Radioactive materials possessed by us are authorized and regulated by our state License (PA-1157 Amendment 14). The same circumstances apply to our state License, with separate Business and shop locations once the license is transferred. I have attached a copy of our request to the PADEP for your review, which documents the split locations, lessee acknowledgement, etc.

Our current status with PADEP is that we have received approval for the sale to occur and we are in the license transfer phase to complete the sale. Due to the company EIN changing, PADEP has to issue a new License due to their system not being able to process the EIN change. No time frame for completion has been given, but we expect to have the new License shortly.

If you need any additional information, or have additional questions, please contact myself or Terry.

Thank you,

John Oreo
