CON-2025-000004	Devine, Thomas	Government Accountability Project	Pursuant to the Freedom of Information Act, 5 U.S.C. 552, as amended, and 10 CFR 9.23 of the Commission's regulations, The Government Accountability Project (GAP) requests that the US Federal Energy Regulatory Commission (FERC) provide any and all records described in the numbered paragraphs below. We believe that FERC considers some of the requested records to be Critical Electric Infrastructure Information (CEII). We understand that FERC as a separate program for releasing that information. GAP is uninterested in agreeing to the terms of the CEII program. We want records that we can openly share with the public. We want all portions of the records, even the portions that FERC considers to be CEII.	11/25/2024
CON-2025-000005	Brown, Ann	Center for Biological Diversity	The Center requests from the Office of Management and Budget ("OMB") and Office of Information and Regulatory Affairs ("OIRA") from March 1, 2024, to the date OMB/OIRA conducts this search, the records that comprise the decision file for the "Amendments to the North Atlantic Right Whale Vessel Strike Reduction Rule" (RIN 0648-BI88) ("Vessel Speed Rule").	11/25/2024
FOIA-2025-000152	McCullough, Irvin	Government Accountability Project	From June 1, 2023, through January 1, 2024, I request a sample of 10 completed FOIA case files from your office's FOIA tracking system where scope clarification occurred. Each case must have all of: (1) a written agency response seeking clarification about the scope of records sought; (2) a written requester response that clarified the request; (3) a final determination letter; and (4) a case closure date within the specified date range.\n\nfor each of these 10 case files, I seek only: (1) the initial FOIA request; (2) the agency's scope clarification letter (or email or similar	11/25/2024

Specifically, for a sample of requests where clarification was needed, I'm looking for the original request, the rationale for clarification, and the clarified request. I am studying how agencies and requesters work together to clarify and refine requests, so I need only the substance of these communications, not any personally identifying details.

If there are multiple copies, I want you to select copies using the following decision rule: 1. Select the largest file if file size differs among several copies; 2. The Staff Issued a Letter Revising the Resource Estimate for the Detailed Review of the Kemmerer Power Station Unit 1 (Kemmerer 1) Construction Permit (CP) Application

On November 27, 2024, the staff issued a letter revising the resource estimate for the detailed review of the Kemmerer Power Station Unit 1 (Kemmerer 1) construction permit (CP) application from 27,000 to 28,500 staff hours (Agencywide Documents Access and Management System (ADAMS) Accession No. [ML24304A977](#)). During the environmental review of the Kemmerer 1 CP application, the staff determined that a Memorandum of Agreement (MOA) and additional consultations were necessary, resulting in additional staff hours to conduct the U.S. Nuclear Regulatory Commission's (NRC) section 106 process of the National Historic Preservation Act. The staff is developing a MOA to mitigate and address the anticipated adverse effects of the proposed construction and completing consultations with a large number of Tribes. At this time, no schedule changes are expected to complete these activities.

The Office of Nuclear Reactor Regulation (NRR) Staff has Determined that the Review of Constellation's Digital Instrumentation and Controls License Amendment Requests for Limerick 1 and 2 Will Be Completed After the 24-Month Generic Milestone Schedule

The Office of Nuclear Reactor Regulation (NRR) staff has determined that the review of Constellation's digital instrumentation and controls license amendment requests for Limerick 1 and 2 will be completed after the 24-month generic milestone schedule, which is December 9, 2024. The NRR staff's review has been delayed because Constellation has not provided all the information needed to complete the review. The Limerick digital instrumentation and controls license amendment request is the first major digital request submitted under Revision 2 of Digital Instrumentation and Controls Interim Staff Guidance 06 and is a first-of-a-kind review that combines three protection systems into a single protection system. The NRR staff identified the missing information to Constellation in our acceptance letter dated December 9, 2022 ([ML22339A064](#)). The missing information concerns equipment qualification and independence and susceptibility to common cause failure of a component used in the proposed digital system. In a letter dated September 19, 2024 ([ML24243A048](#)), the NRR staff informed Constellation that the completion schedule for the review would be provided after the licensee provided all the information needed to complete the review. Constellation has not yet provided a schedule for submitting the missing information. So, the NRC staff does not know at this time, the full impact on the review schedule and whether the generic milestone schedule will be exceeded by 90 days, which would require an additional notification to Congress of the exceedance. Additionally, this schedule delay does not impact licensee implementation schedule.

The NRC Staff Issued an Assessment of Seismic Hazards at VC Summer, Following the Process for the Ongoing Assessment of Natural Hazards Information (POANHI)

On November 25, 2024, the NRC staff issued an assessment of seismic hazards at VC Summer ([ML24221A062](#)), following the process for the ongoing assessment of natural hazards information (POANHI). The NRC staff assessment considers new seismic ground motion attenuation models for central and eastern North America and updated seismic site response

methods. Based on its evaluation of updated seismic hazard curves, using the new ground motion models and updated site response methods, the NRC staff determined that no further regulatory evaluation of VC Summer seismic risk is warranted at this time. This is the eighth of the first set of 13 plants the NRC staff is re-evaluating based on this new seismic eastern ground motion model.

The Office of Nuclear Material Safety and Safeguards (NMSS) Staff Held a Public Meeting on Regulatory Issues at Brownfield Sites

On November 21, 2024, the Office of Nuclear Material Safety and Safeguards (NMSS) staff held a public meeting to discuss Section 206 of the ADVANCE Act, "Regulatory issues for nuclear facilities at brownfield sites." The meeting included invited speakers from the Gateway for Accelerated Innovation in Nuclear, NEI, EPRI, Duke Energy, Energy Northwest, and Oklo. Participants provided feedback on improving licensing efficiency by leveraging existing brownfield site data and information, alternative methodologies for meteorological data collection, and population-related siting considerations. The staff is developing a detailed meeting summary and will use the meeting feedback to inform its evaluation of how to expedite licensing at brownfield and retired fossil fuel sites. The next public meeting on Section 206 will be in mid-January.
