Dr Peter bird estimated the chances of an earthquake causing core damage at Diablo Canyon is 47 times higher than PG&E estimated. Earthquakes could cause more ground motion than formerly predicted.

Unit 1's reactor vessel is vulnerable to embrittlement. It need to be tested before permitting.

The nuclear industry has a history of defects and negligence. See the video, " San Onofre Syndrome". Tubes broke. A container that was almost dropped almost exploded. The radioactive waste was stored in thin containers that would deteriorate before the radioactivity decreased to handleable levels. The barrels were not protected enough from sea level rise. Likewise in time more mistakes may be found at the Diablo Plant.
