GROUP, INC., NRC LICENSE NO. 24-32442-02**

Dear Bernard:

In letter dated May 30, 2024, you notified the U.S. Nuclear Regulatory Commission (NRC) of a request to terminate NRC Materials License No. 24-32442-02. Your letter is available electronically from the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML24152A043.

The NRC staff has reviewed the information provided. Based on its review, the NRC staff has concluded that all licensable radioactive material has been removed from your facilities located at 1735 Delmar Blvd., St. Louis, MO 63103. The NRC staff has also concluded that residual radioactive material attributable to licensed activities does not exceed current NRC criteria at these locations.

Based on these conclusions, no further remediation or actions are required with respect to NRC-related material. Your facilities are suitable for unrestricted use, and NRC Materials License No. 24-32442-02 is hereby terminated (See enclosure for the amended license stating that the license has been terminated).

An environmental assessment for this action is not required because this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (10 CFR) 51.22(c).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS, accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.
