Subject: Application for New NRC License for Niles Industrial Coatings
Date: Tuesday, November 19, 2024 1:30:00 PM

Greetings Mr. Day,

Thank you so much for taking the time to discuss your application for a new NRC materials license with me today. As we discussed, the application that you submitted, which includes your Site-Specific Radiation Procedures, is potentially overly restrictive. Please resubmit your application and include the following documentation:

1. Please provide a complete NRC form 313 (attached). Please be sure that the form has been dated and signed by a duly authorized representative. For your convenience you may resubmit the Form 313 that you initially submitted dated September 30, 2024.
2. For your convenience and the streamlined handling of portable gauge applications, you may use Appendix B, "Suggested Format for Providing Information Requested in Items 5 through 11 of NRC Form 313," to [NUREG 1556 Vol.1, Rev. 2](#) to provide the supplemental information as required by NRC form 313. Your initial application included the use of this checklist, however **we will need the following information:**

For Item 10.8 please note:

- There are **two** checkboxes in this section, one for Routine Cleaning and Operation and one for Nonroutine Maintenance. **You will need to make a selection for each.**
3. Please provide a facility diagram for each permanent storage facility authorized on the license. The diagram should be drawn to scale and include the use of adjacent areas (including above and below), and information relevant to public dose and security. Additional information regarding public dose and security is discussed in Sections 8.10.5, "Public Dose," and 8.10.6, "Operating, Emergency, and Security Procedures," to NUREG 1556, Vol. 1, Rev. 2. Your initial application included a facility diagram, however, **we will need the following information:**

The facility diagram of the warehouse included in your application has been compressed and the details are not legible. Please resubmit a copy the warehouse section of the facility diagrams.
 4. As we discussed, you have chosen to have Brandon Miller specifically listed on your license as Alternate RSO. Please provide a brief statement outlining the duties and task that will fall under Mr. Miller's responsibility.

Please provide an updated submission by close of business on Tuesday, December 2,

2024. If you have any additional questions, please give me a call on my cell phone at 505-699-3675

Thank you,

Erin Kennedy
