---

Hello All,

As part of our consultation process for the license renewal of the Diablo Canyon (DC) Independent Spent Fuel Storage Installation (ISFSI), the U.S. Nuclear Regulatory Commission (NRC) staff has prepared a final environmental assessment (EA) in accordance with its regulations. Based on the EA, the NRC has concluded that a finding of no significant impact (FONSI) is appropriate.

To review the Federal Register Notice (FRN) please click on this link [89 FR 89056](#).

The licensing action or undertaking is the renewal of Special Nuclear Materials (SNM) License No. SNM-2511 for the DC ISFSI located in San Luis Obispo County, California. If approved, under the renewed license SNM-2511, Pacific Gas and Electric Company (PG&E) will be able to continue to operate the DC ISFSI for an additional 40 years.

Please feel free to forward this message on to others who are interested in this undertaking. If you have questions or concerns you can reach out to me or Isaac Johnston, who is cc'd on this email.
