501(a) OF THE ADVANCE ACT OF 2024

As required by subsection 501(a) of the Accelerating Deployment of Versatile, Advanced Nuclear for Clean Energy Act of 2024 (ADVANCE Act), the Commission has approved updating the Nuclear Regulatory Commission's mission statement as follows:

The NRC protects public health and safety and advances the nation's common defense and security by enabling the safe and secure use and deployment of civilian nuclear energy technologies and radioactive materials through efficient and reliable licensing, oversight, and regulation for the benefit of society and the environment.

The staff should submit an information paper to the Commission providing the guidance to ensure effective performance of the mission as required under section 501 (b) of the ADVANCE Act before the draft report is provided to the respective Senate and House Committees.

In its development of the implementation guidance, the Office of the Executive Director for Operations should cite specific, practical examples of actions that serve to clarify how to effectively implement and successfully execute the mission.
