Hello Ben,

Thank you for speaking with me earlier today. My understanding from our conversation and your corrected amendment request are as follows;

- There will be no change to the 1.2 Ci overall possession currently listed on your license, and
- Holcim has not disposed of, transferred, or taken any source out of service since the July 18, 2024 issuance of amendment 7 of your NRC license.

Please reply to this email confirming or correcting the above statements.

Best,

Gianna Porro

Hello Ben,

Prior to issuing your amendment request clarification is required. I've called and left messages on both your work cell phone and office number on 1/25 and 1/27. Kindly return my call at 630-829-9838. A delay in clarification on your amendment request will directly impact the speed at which I am able to issue the newest amendment.

Best,

Gianna Porro

Dear NRC:

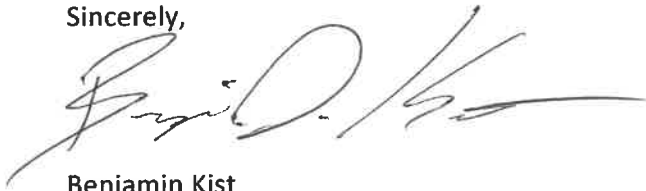

I am writing to formally request an amendment to the license for the Holcim Ste. Genevieve Cement Plant, License No., 24-32702-01. The specific amendment requested is to increase the single source limit from 100 mCi to 250 mCi for the purposes of duration. We are implementing two additional sources and detectors in the plant near the existing equipment, with the same configuration. While the cumulative limit (1.2 Ci) is still being met, the new sources are 250 mCi.

The incoming materials are as follows:

Manufacturer: Berthold
Device Name: Point Source
Device Model: LB 7444-Cr
Registration Number: TN-1031-D-101-B
Isotope: Co-60
Souce Activity (mCi): 250
Source Model Number: SSC-100

Please amend License No. 24-32702-01 to allow for these changes. If possible, I would like these changes to be in effect by February 15th, 2025.

Sincerely,

A handwritten signature in black ink, appearing to read 'Benjamin Kist', written over a light blue horizontal line.
