Clinton Power Station, Unit 1  
Facility Operating License No. NPF-62  
NRC Docket No. 50-461

Subject: First 10 CFR 54.21(b) Annual Amendment to the Clinton Power Station, Unit 1, License Renewal Application

Reference: Letter from Christopher D. Wilson (Constellation Energy Generation, LLC) to U.S. NRC, "Application for Renewed Operating License," dated February 14, 2024 (ML24045A024)

In the Reference letter, Constellation Energy Generation, LLC (CEG) submitted a License Renewal Application (LRA) for Clinton Power Station, Unit 1 (CPS).

10 CFR 54.21(b) requires submitting an amendment each year following submittal of the LRA and at least three months before the scheduled completion of the NRC review identifying changes to the current licensing basis (CLB) that materially affect the content of the LRA, including the FSAR supplement.

CEG has completed the first annual review for the period from October 31, 2023 through December 1, 2024, and concluded that no CLB changes have been implemented which have a material effect on the content of the LRA, including the FSAR Supplement.

Should you have any questions regarding this submittal, please contact Ms. Lydia S. Dworakowski, Licensing Lead, CPS License Renewal Project, by email at [Lydia.Dworakowski@constellation.com](mailto:Lydia.Dworakowski@constellation.com).
