January 31, 2025

Cade J. Register, MHP, CHP
Radiation Safety Officer
Ideal Source Quality Assurance, LLC
c/o William Yelon, Ph.D.
5195 Europa Dr., Unit N
Boynton Beach, FL 33437

SUBJECT: AMENDMENT NO. 03 TO RADIOACTIVE MATERIALS LICENSE FOR
IDEAL SOURCE QUALITY ASSURANCE, LLC, U.S. NRC MATERIALS LICENSE
NO. 24-32675-01

Dear Mr. Register:

Enclosed is Amendment No. 03 to your U.S. Nuclear Regulatory Commission (NRC) Materials License No. 24-32675-01 in accordance with the application dated October 7, 2024, and the letter dated January 16, 2025, both signed by William Yelon, Ph.D., Principal Scientist.

This amendment accounts for your appointment as Radiation Safety Officer. This change is identified in Condition 11 of the license. Additional changes to the license were also made in accordance with the above referenced requests, including:

- designation of the new mailing address in Boynton Beach, Florida, in Item 1;
- addition of the new location of use in Columbia, Missouri, in Condition 10.B.;
- additional procedural changes, parent company's address change, facility diagram and description, and the delegation of authority are referenced in Condition 20, Parts C and D.

To proceed with removing the former location of use of licensed materials, please submit a separate amendment request. With this request, include a summary of the past use of licensed materials at the former location of use specifically identifying any incidents involving licensed materials that may have occurred. Further, please provide records of the transfer/disposal of licensed materials and a closeout survey report demonstrating that the former location of use is acceptable for release to unrestricted use.

It appears that William Yelon, Ph.D., is relocating to Boynton Beach, Florida. In this case, consideration for the appointment of an additional Authorized User may be needed to ensure that the use of licensed materials is performed under appropriate supervision. If needed, please follow-up by requesting an amendment to Condition 12 of the license to designate another qualified individual to serve as an Authorized User when Dr. Yelon is not available to supervise licensed activities.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. NRC Region III office at (630) 829-9887 so that appropriate corrections or answers may be provided.

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

-2-

An environmental assessment for this action is not required because this action is categorically excluded under [Title 10 of the Code of Federal Regulations \(CFR\) Section 51.22\(c\)\(14\)](#).

You will be periodically inspected by the U.S. NRC. Failure to conduct your program in accordance with U.S. NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with U.S. NRC will result in enforcement action against you. This could include issuance of a notice of violation; or imposition of a civil penalty; or an Order suspending, modifying, or revoking your license as specified in the U.S. NRC Enforcement Policy. Since serious consequences to employees and the public can result from failure to comply with U.S. NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance that U.S. NRC expects of its licensees.

The U.S. NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on U.S. NRC's safety culture website at <https://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. I encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in U.S. NRC-regulated activities.

[U.S. NRC's Regulatory Issue Summary \(RIS\) RIS 2005-31](#) provides criteria to identify security related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through NRC's ADAMS, the NRC's electronic document system. Pursuant to U.S. NRC's RIS 2005-31 and in accordance with 10 CFR 2.390 of the U.S. NRC's "Rules of Practice and Procedure," the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the U.S. NRC's Generic Communications webpage under "Regulatory Issue Summaries" at <https://www.nrc.gov/reading-rm/doc-collections/gen-comm/>, and the link for frequently asked questions regarding protection of security-related sensitive information may be located at <https://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the U.S. NRC Public Document Room or from the U.S. NRC's ADAMS, accessible from the U.S. NRC website at <https://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Jason M. Kelly, MPH, CPH
