Fort Worth, TX 76102-0300

SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 42-18191-01

By email dated January 29, 2025, you informed the U.S. Nuclear Regulatory Commission (NRC) that the U.S. Corps of Engineers, Fort Worth District, wished to terminate NRC license number 42-18191-01. The NRC Form 314 dated January 27, 2025, stated that all radioactive material had been transferred to licensed entities.

The supporting documentation to the NRC Form 314 provided copies of the most recent leak test results demonstrating that there was no evidence of leakage of radioactive material from the sealed sources contained in the portable gauging devices that were transferred. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material has been removed from the licensee's facilities. The facilities located at Central Texas Area Office, QA Facility, Building 4623, Santa Fe Avenue, Fort Hood, Texas, 76544, and U.S. Army Corps of Engineers Office, 819 Taylor Street, Room 4M02, Fort Worth, Texas, 76102, are suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment No. 16 to License No. 42-18191-01 authorizing license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Roberto J. Torres, M.S., Senior Health Physicist
Materials Licensing Branch
